The river pre-2009 was a verdant place, with large crack willow trees. These have since been removed in the hope that this will reduce the threat of flooding.

A paved walkway made of reddish-brown bricks runs alongside a building with grey corrugated metal siding. To the left of the path is a black metal fence and dense green foliage. To the right is a gravel area with some green plants and a person sitting on a bench under a shelter. The scene is outdoors on a bright day.

The Five Weirs walk provides access along much of the Don in this part of Sheffield. It's a particular favourite with smokers from adjacent industrial units.
